The "gadget" is a little machine that shows the difference between ordinary cord, used in other tires, and Supertwist cord, used in Goodyears... That difference is in the stretch and comeback—you can see how Supertwist cord stretches and comes back, how the cord in other tires loses its life and elasticity... It takes about 2 minutes to tell the story—but as this customer said—"If every car owner could see that demonstration, there wouldn't be anything used but Goodyear Tires."
